# About WebKIDSS...

## WebKIDSS Users Favorite Features

- Seamless integration of evaluation, identification, placement, progress reporting, and IEP development processes
- Share student/IEP data imports/exports with other districts
- Agency can change the entry and print order of the IEP
- Ability to export MIS data to LEAMIS
- Integrated Error and MIS Error Checks
- Capability to customize IEP and Forms
- Inclusion of Kansas State Standards
- Customized List and Print options
- Administrators' ability to review IEPs online
- Ability of users to access WebKIDSS from anywhere
- Service line date auto completes
- Locate a student across entire database

WebKIDSS is a data management system that is developed by Kansas Educators for Kansas Educators. The program allows the user to produce an IEP, generate the state MIS and other reports including information for program evaluation. Users are able to access their caseload from any computer with internet access.

The program is updated annually based on users' feedback, state requirements and feedback from the Development Group.

WebKIDSS is an endeavor of the Kansas Educational Technology Consortium. Membership in this group entitles you to use the Kansas Individualized Data System for Students (WebKIDSS). The membership fee is based on number of special education students served. Those joining after October 1, 1994 pay 150% of their rate for two years. This fee is established by the Consortium Members at their annual spring meeting. This fee provides agencies with materials for WebKIDSS, System Administrator training, and technical support. It also allows for continued development of the WebKIDSS program. The current rates range from \$1,250 for the smallest agencies to \$4,270 for the largest agencies. Agencies also need to purchase copies of 4D and the 4D web extension (approximate cost is \$2,300).

### **Minimum System Requirements (Server)**

#### **Windows:**

Pentium II minimum  
800 X 600 monitor resolution  
Windows 2000, Windows XP  
256 MB RAM minimum

#### **MacOS:**

G3 or better processor  
800 X 600 monitor resolution  
Mac OS X v10.3.9 or later  
256 MB RAM minimum

\*Note: Hosting services are also available from NEKESC for a fee if agencies wish to have their program deployed for them
